(54) Title: TRUE POSITION BENCH

(57) Abstract: An optical package having a top and bottom orientation and comprising: (a) a platform defining a V-groove with walls of a certain pitch; (b) a first optical component having a reference surface and two sides, each side being beveled at the certain pitch outwardly from the reference surface, the first optical component having a first optical axis, the first optical component being disposed in the V-groove such that the reference surface faces downward and the sides are in parallel contact with the walls of the V-groove; and (c) a second optical component having an outer periphery with at least two contact points and a second optical axis, the second optical component being disposed in the V-groove such that the contact points contact the walls of the V-groove and the second optical axis is coaxial with the first optical axis.
